03 · Team — who we are

Four Masters students and a coach, with the working agreements and the division of labour that make four people faster than one under a three-hour clock.

The four roles — finance lead · innovation lead · CS & analytics lead (also the **designated GenAI operator**) · general-business strategist (owns the clock and the storyline). All four run against one shared team clock; all four must speak in every round.

The files

1. `team_charter.md` — commitments, working rules, non-negotiables, escalation path. **Signed in W1** by all five. Short on purpose.
2. `role_playbooks.md` — the operational core of this folder: per-role mission, artifacts, and **prep minute-maps in a 3-hour and a 4-hour column**, plus drills, failure modes, the **GenAI standard operating procedure**, and the one-page prep-room kit checklist. Re-read your column before every timed simulation.
3. `coach_and_ai_rules.md` — the two questions that decide coach behaviour: may we use AI in competition (**yes, explicitly**), and what may the coach do, round by round. The coach's influence ends at case release and resumes at the feedback session.

The hard rules that live here: no coach contact from the release of a timed case until the team has presented · no unverified number reaches a slide · nothing said, worn, or shown identifies HSBI.

Per-file detail: `../DOCUMENTATION.md` §2 · conventions: §8.
