05 · Practice cases — what we train on

Simulation material for Phases 2–4, in order of value. Aim for variety across the three round formats and the recurring ABCC client types. Ten simulations are scheduled in `../02-plan/week_by_week_plan.md`; every result goes into `../02-plan/simulation_log.md` the same day.

1. Real ABCC cases first — the best material there is

Eleven official past cases (2023–2026) across ten clients (2023 ran both rounds on Manitoba Hydro). Six PDFs are mirrored in `../01-competition/past-case-pdfs/`; the other five (2024 cases 1 and 3, all three 2026 cases) download from the URLs in `../01-competition/facts_and_rules.md`. All eleven are profiled with **re-crack briefs** — task, guiding questions, and what a winning answer needed — in `../01-competition/past_cases.md`.

Recommended order: Manitoba Museum 2025 (prepared) → People Corporation 2025 (traditional) → AROW Global 2025 (boardroom) → Independent Jewellers 2024 (boardroom) → Access CU / Jazz Winnipeg / Coal & Canary 2026 from the re-crack briefs → the Manitoba Hydro 2023 pair for framing drills.

Seven of the ten planned simulations run on these.

2. Original full cases — for graded simulations

Written for this team in the exact format of each round, each with exhibits, a formal task statement, and a **coach-only teaching note** (solution space, traps, judge questions, 100-point rubric):

File	Round format mirrored	Client	Exhibits	Runs in
`case1_traditional_sparkasse_youth.md`	Traditional, 3 h, 20 + 10, 45 %	Sparkasse Ostwestfalen — winning back the under-30s	8	W17
`case2_boardroom_premium_brand.md`	Boardroom, 4 h, 3-min pitch + 22-min discussion, 30 %	Manufaktur Lichtwerk — premium candles going luxury	6	W19
`case3_prepared_arts_festival.md`	Prepared, 14 days, 25 + 15, 25 %	Klangfest Bielefeld — one radical operational idea	8	W23–24

Each mirrors a real 2026 archetype (Access Credit Union, Coal & Canary, Jazz Winnipeg respectively). Save them for **graded** simulations: unlike a re-crack, they are genuinely unfamiliar material.

Coach only: every teaching note sits behind a `# === TEACHING NOTE (coach only) ===` marker at the end of the file, and the tables of contents stop there. Team members read the case body and the task, and nothing past that marker, until they have presented.

3. Mini-cases — the weekly 30–45-minute drill

Twelve one-page cases, each with a 90-second sizing warm-up and a boxed solution sketch:

- `mini_cases.md` — cases 1–6, from W13.
- `mini_cases_set2.md` — cases 7–12, Canadian-leaning and quant-heavier, from W19; closes with the author-your-own assignment (from W20 each member writes one).

The full drill inventory — ≈200 solved exercises including four workbooks and the format quiz — is cataloged week by week in `../04-training/exercises/README.md`.

4. Calibration

`model_answers.md` — one fully worked answer outline (Access Credit Union 2026 re-crack) and one filled one-page judge brief (AROW Global 2025), so the team sees what "good" looks like before being marked against it.

05 · Practice cases

5. Other sources, when this folder runs dry

- **Other competitions' released cases and finals videos** (John Molson MBA ICC, JMUCC) — winning-team videos are prime study material for delivery and Q&A.
- **Ivey / Harvard case collections** — short cases (5–15 pages) via the university library, for timed structuring drills.
- **Consulting-club casebooks** (free online) — market sizing and structuring.
- **Self-written mini-cases** — one-page prompts on real regional companies with 3–4 public exhibits; cheap and fresh.

The 2027 pattern to train against

The client formula has been stable for three years (see `../01-competition/past_cases.md` Part III): **prepared** = arts/culture non-profit with a sustainability problem · **boardroom** = owner-led local consumer or family business at a growth or positioning crossroads · **traditional** = large Manitoba-rooted enterprise with a trust, talent or digital-engagement challenge — always with a Manitoba anchor. Scan Winnipeg's arts scene and prominent local firms before February.

> ***Case data in the original cases is fictional*** *and labelled as such; the companies are invented. Teaching-note figures are calibration aids, not real-company facts.*

Per-file detail: `../DOCUMENTATION.md` §2 · how a simulation is run: §4.
