Workbook 3 — Storyline, Slides & Implementation Drills

Method reference: `04-training/presentation_and_storyline_guide.md`. Templates: `06-templates/`. The heaviest rubric category (Implementation & Resources, 2.5×) gets its own drills here — by design.

Exercise 3.1 — Action-title rewrites · 15 min, solo, weekly until sharp

Rewrite each weak title as a full-sentence action title carrying the slide's message (invent plausible content where needed):

1. "Market Overview" 2. "Financial Analysis" 3. "Our Recommendation" 4. "Customer Segments" 5. "Risks" 6. "Digital Trends in Banking" 7. "Implementation" 8. "Competitive Landscape" 9. "Survey Results" 10. "Conclusion"

Model rewrites. *1 "The €110M premium segment grows 11% — while the mid-market shrinks beneath it." 2 "The plan pays back in year 3: €2.5M buys €1.1M of annual contribution." 3 "Launch the two-tier line: protect the €6.8M core, build the margin on top." 4 "Two of four segments carry 74% of value — and both are reachable through one channel." 5 "The three real risks are priced in — and each has a trigger and an owner." 6 "Instant onboarding is table stakes: every rival opens accounts in under 10 minutes." 7 "Ninety days to first proof: pilot, gate, then scale." 8 "No incumbent serves the niche end-to-end — the window is 18–24 months." 9 "Customers grant permission to climb: 66% credit craftsmanship, 24% see luxury today." 10 "Approve €X today; the first gate reports in March."* Test: read your ten titles alone — they must tell the story.

Exercise 3.2 — Storyline sprint · 25 min, pairs

Take the Coal & Canary re-crack brief (`01-competition/past_cases.md` §2). Produce a title-only deck: 12 action titles in order, nothing else. Then compare against the Access CU model storyline in `05-practice-cases/model_answers.md` for shape (not content): answer-first? diagnosis before options? implementation before risks? one narrative line?

Marking. *A pass has: recommendation stated by title 2–3; a "what luxury requires" step; the channel-consequence step; a financial bridge; a phased roadmap title with dates; a risk title that names the biggest risk, not "risks". Common fail: ten titles of analysis, recommendation at title 11.*

Exercise 3.3 — Horizontal-logic repair · 10 min, solo

The eight titles below are shuffled. Order them into the storyline (numbers only): A "Risks are capped: gate 1 puts only $0.6M at stake, fully sunk-cost" · B "We recommend FieldGuard: $12M by Year 3 at 42% margin, gated in three steps" · C "The screen leaves one winner from twelve candidates" · D "Growth has stalled: 90% share leaves nothing to win in transit" · E "Gate 1 asks for $0.6M — full commitment only after LOIs and prototype" · F "Four of five required capabilities already run in our plants" · G "The ag-and-construction niche buys $30–40M a year and is fragmented" · H "Three-phase roadmap: validation, pilot line, scale to $10M+"

Answer. *$D \to B \to C \to G \to F \to H \to A \to E$ (C may move ahead of B only if you argue the screen first; answer-first is non-negotiable, so B never falls below position 3). This mirrors the AROW model brief in `05-practice-cases/model_answers.md` — keep its gate figures, and note that AROW is a Canadian/US manufacturer, so every FieldGuard number is in dollars.*

Exercise 3.4 — Implementation-plan drills (the 2.5× muscle) · 20 min each, rotate weekly

Turn each recommendation into a table: phases with dates, owner, cost, and 3 KPIs with targets — nothing else on the page:

1. Klangfest launches the B2B "Klangwerk" unit (from case 3's teaching note). 2. Sparkasse OWL launches the under-30 bundle (case 1). 3. The Manitoba Museum returns blockbusters with a sponsor-capped downside (Ex 2.3). 4. Thiessen & Sons pilots national clienteling (mini-case 2). 5. Senne Präzisionstechnik closes 10 of 14 roles (mini-case 6).

Model for (3). *P1* Now–Jun 2027 *— secure title sponsor ≥$200k + book title show; owner: Development Director; cost $40k (sales + legal). P2* Jul–Oct 2027 *— marketing, schools pre-booking, dynamic pricing live;*

owner: Marketing Lead; $120k. P3 Nov 2027–Feb 2028 *— run show; weekly attendance vs 33.4k break-even path; owner: CEO. KPIs: sponsor signed by Jun 30 (gate); pre-booked school visits ≥ 15k; week-6 attendance ≥ 45% of target, else cost-cut protocol.* Every drill answer must survive the question "who exactly, by when, for how much?"

Exercise 3.5 — The boardroom one-slider · 15 min, solo, before every boardroom sim

Build the single summary slide for Manufaktur Lichtwerk (case 2) using slide 14 of `06-templates/team_-template.pptx`: recommendation sentence, three pillars with numbers, risk+ask bar. Compare with the case's teaching note. Time yourself: under 15 minutes from blank to done — in the real 4-hour window this slide gets no more.
