07 · Logistics — getting there and operating there

Bielefeld to Winnipeg and back, plus the script for the five days on the ground.

The files, in the order they become urgent

1. `registration_email_draft.md` — **W1, send this first.** Ready to go to `aspercasecomps@umanitoba.ca`; it registers the team and puts all seven open questions (eligibility, fees, agenda, roster requirements, hotel block, rule deltas, invitation letter) into one exchange.
2. `travel_logistics.md` — the admin track that runs from August to February: eTA for German citizens, flight routings and price bands, the team hotel, airport transfer, campus transfers, the **−30 °C clothing list**, money and SIM, insurance (**statutory German GKV does not cover Canada**), the 7-hour jet-lag plan, and the booking countdown.
3. `competition_day_runbook.md` — hour-by-hour sheets for all five days, the standing rules that apply all week, and the contingency plans. This is the file the team operates from in Winnipeg; print it.

The dates, and the one caveat. The competition is **February 18–22, 2027**, which falls **Thursday–Monday**. Both previous editions ran **Wednesday–Sunday** (2025: Wed Feb 19 – Sun Feb 23; 2026: Wed Feb 18 – Sun Feb 22), so 2027 would be the first Thursday start. The day-sheets assume the published Thu–Mon window with the round order inherited from 2025, and say so in place. The travel plan is deliberately robust to both readings: arriving **Feb 16/17** and returning **Feb 22/23** covers a Wednesday start as well as the published Thursday one — **but do not book non-refundable tickets outside that envelope until the 2027 agenda is confirmed.**

Per-file detail: `../DOCUMENTATION.md` §2 · the milestone dates: `../02-plan/week_by_week_plan.md`.
