06 · Templates — what we build with

Competition-legal assets, built outside prep time. **Own** prebuilt templates are explicitly permitted; **third-party** templates are not allowed for the prepared case.

When a case lands, in this order

1. **Classify the case** — `case_type_playbook.md`, first ten minutes. Six types (A turnaround · B growth/entry · C premiumization · D product screen · E digital engagement · F talent/change), each with its core question, decisive analyses, storyline, judge attacks and counters, traps, and self-checks.
2. **Duplicate the matching skeleton** from `case-type-templates/` — `casetype_A…F`, 11–13 slides each, type-tuned storyline with coaching in the speaker notes. **Delete the red coach-briefing slide before any round.** For an unclassifiable case, fall back to `team_template.pptx`, the general 14-slide skeleton (incl. the boardroom one-slide summary).
3. **Run every number** through `case_financial_toolkit.xlsx` — market sizing (top-down and bottom-up with cross-check), unit economics and break-even with a sensitivity grid, NPV and payback, CLV cohort. **Blue = inputs, yellow = key assumptions.** Never retype a figure you have not sanity-checked here.
4. **Boardroom rounds only:** fill `judge_brief_template.docx` — one page, black and white, recommendation / three pillars / numbers table / risks / 90-day ask. Its wording must mirror the summary slide, because the judges read it before the team walks in.

Anonymity

Every asset here is deliberately clean of HSBI branding. The templates carry the placeholder consulting name **"Aurora Advisory"** — replace it with the fictional name the team registers with the organizers. The division letter (A–I) is drawn at on-site registration, not chosen. **Never commit the HSBI name into any file in this folder.**

Per-file detail: `../DOCUMENTATION.md` §2.
