07 · Logistics — operating on the ground

The organizer exchange, and the script for the five days in Winnipeg.

The files, in the order they become urgent

1. `registration_email_draft.md` — **W1, send this first.** Ready to go to `aspercasecomps@umanitoba.ca`; it registers the team and puts the open questions (eligibility and fee, 2027 agenda and prepared-case dates, roster requirements, rule deltas) into one exchange.
2. `competition_day_runbook.md` — hour-by-hour sheets for all five days, the standing rules that apply all week, and the contingency plans. This is the file the team operates from in Winnipeg; print it. The pre-departure briefing in the week before the flight is presented from `competition_day_runbook.pptx` (29 slides, built from `tools/slides/`).

Travel, visas, accommodation and everything else off the competition floor are handled outside this repository — nothing here depends on them.

The dates, and the one caveat. The competition is **February 18–22, 2027**, which falls **Thursday–Monday**. Both previous editions ran **Wednesday–Sunday** (2025: Wed Feb 19 – Sun Feb 23; 2026: Wed Feb 18 – Sun Feb 22), so 2027 would be the first Thursday start. The day-sheets assume the published Thu–Mon window with the round order inherited from 2025, and say so in place — **the round-to-day mapping is the first thing to reconcile when the 2027 agenda lands.**

Per-file detail: `../DOCUMENTATION.md` §2 · the milestone dates: `../02-plan/week_by_week_plan.md`.
